

## PRESIDENTS CORNER – June 2022

By Terri Jones

### Presidents Corner

Our newest adventure took us to Fawn Ridge Rv in Davenport Florida in June. Myself and Pat and Lori Thomas hosted our visitors. Some came the whole week before to explore and enjoy the area.

We had a bit of sad news during our stay, one of the residents from the park passed away and left behind a female pup named Maggie. After inquiring about her condition

and concern for her care, John and Nancye Glenn stepped up and adopted her. She is now living in Loganville, Ga. Thank you for having such a big heart for Maggie!!

Early members ate at several local restaurants around Orlando, Celebration Tavern and Ovations. Ed Gruba was our birthday guest.

I hosted everyone on Thursday night with a cookout at my residence. Friday and Saturday nights we had dinner at the clubhouse. Never got around to playing games last we seemed to enjoy socializing and catching up with Pat and Marvin with all their travels.

Pat Voyna presented Peach State Travelers with our 30th yr anniversary of our FMCA charter.

Once again I appreciate the commitment to our members who made the trip and hope everyone enjoyed the view!!

See you all soon..

Sincerely,

Terri Jones President

### RV RECALL

Eight RV manufacturers, 37 models and 22,021 RVs from model years 2021 and 2022 have dangerous RV cracked and porous LP gas fittings that can lead to a fire, and they don't know it.

Worse yet, almost all of the RV factories say they will not send notices to tell dealers or the public about it until July 1st.

The recalls were quietly announced by the National Highway Traffic Safety Administration, but virtually all factory warning letters to the RV dealers and owners of these RVs will not go out until July 2022, according to filings with federal safety regulators.

Meanwhile, they say 100% of certain models of Cruiser RV, DRV, Heartland, Highland Ridge, Jayco, KZRV, Thor, and Starcraft have cracked gas fittings on recall.

Federal Recall personnel at NHTSA, the federal agency in charge of vehicle safety recalls, announced the fittings were made by Texas-based Flex Tech, which has a plant in Goshen, Indiana, with contaminated brass that can result in LP gas leaks, which can lead to a fire.

While the brass fittings may appear perfectly normal, the contamination created "porosity" in the metal is such that when you torque down the fitting, it can crack and LP gas may escape.

When one company makes the same exact part for many RV manufacturers and they make it wrong, the defect can affect thousands of RV owners. The higher risk here is that recall notices are not even scheduled to go out until July 1, putting thousands of RVers at risk in the meantime.

If your RV is involved (see the full list below), call your RV dealer for more information.

## Hitchhiking

A guy was on the side of the road hitchhiking on a very dark night and in the middle of a storm. The night was rolling on and no car went by. The storm was so strong he could hardly see a few feet ahead of him.

Suddenly he saw a car coming toward him and stop. Without thinking about it, the guy got into the back seat, closed the door and then realized there was nobody behind the wheel! The car started slowly; the guy looked at the road and saw a curve coming his way. Scared, he started to pray begging for his life. He hadn't come out of shock, when just before he hit the curve, a hand appeared through the window and moved the wheel. The guy, paralyzed in terror, watched how the hand appeared every time right before a curve.

Gathering his strength, the guy finally jumped out of the car and ran to the nearest town. Wet and in shock, he went to a restaurant and started telling everybody about the horrible experience he went through.

A silence enveloped everybody when they realized the guy was serious.

About half an hour later, two guys walked in the same restaurant. They looked around for a table when one said to the other,

"Look John, that's the dummy who got in the car when we were pushing it."
